

I am opposed to this proposed change to ease the controls over media ownership of radio stations in urban areas or any other area for that matter.

People watch TV but listen to radio. Usually this listening is part of the background and this mental state opens one up to subliminal type of influences. Additionally when any corporation has a effective/virtual monopoly in an information outlet, which is radio, the truth will be skewed to the wishes of those in power at the corporation. A corporation by definition can not be trusted to be honest, truthful or even moral.
